Summary

Information Technology student graduating in 2027, building full-stack web products with Next.js, TypeScript, React, PostgreSQL, and AI APIs. Experienced in taking products from idea to deployment, including interactive interfaces, authentication, database persistence, API integrations, and AI-assisted developer tools. Seeking a paid frontend or full-stack software engineering internship.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL

Frontend: Next.js, React, React Flow, Tailwind CSS, HTML, CSS

Backend & Data: Node.js, REST APIs, Prisma, PostgreSQL, Supabase, MongoDB

AI & Tools: Groq/OpenAI APIs, LLM Pipelines, MCP Servers, Docker, AWS, Git

Projects

ArchDraw – AI Architecture Diagram Generator

[Live Demo](#) | [GitHub](#)

Next.js, TypeScript, React Flow, Groq, Prisma, PostgreSQL

- Built an AI-assisted architecture diagramming product that converts natural-language prompts and GitHub repositories into interactive system diagrams.
- Implemented Mermaid-to-Dagre graph layout, an editable React Flow canvas, and PNG, SVG, JSON, and Mermaid export options.
- Developed OAuth authentication, Prisma/PostgreSQL persistence, sharing and embed support, analytics, usage limits, and an MCP server for AI assistants.

GitGo – Open-Source Contribution Matching

[Live Demo](#) | [GitHub](#)

Next.js, TypeScript, MongoDB, GitHub REST API

- Built a developer platform that helps users discover beginner-friendly open-source issues based on their technology interests.
- Integrated the GitHub REST API to fetch, filter, and present current repository issues for aspiring contributors.

Reimbursor – Reimbursement Management System

[Live Demo](#) | [GitHub](#)

Next.js, TypeScript, Prisma, PostgreSQL, NextAuth.js

- Built a multi-tenant expense-management system for employee submissions, approval workflows, and financial oversight.
- Designed multi-step approval workflows, expense categorization, and reporting dashboards using Next.js App Router.
- Modelled relational data with Prisma and PostgreSQL for users, expenses, receipts, and approval records.

Education

Bachelor of Engineering – Information Technology

Expected May 2027

A. P. Shah Institute of Technology, Thane

CGPA: 8.5 / 10

Certifications

- AWS Cloud Practitioner—NextWork AWS Challenge | Docker & Containerization—NextWork AWS Challenge
- SQL Mastery Bootcamp—GDG on Campus APSIT
- Problem Solving (Basic)—HackerRank
- Intro to Machine Learning, Python—Kaggle
- AI Agents & Multiagent Systems—IBM SkillsBuild

Additional

- Publish technical write-ups on Medium about full-stack development and AI tools: medium.com/@jamdadeabhishek039
- Interests: daily running, hiking
- Competed in 5+ hackathons; placed in the Top 60 nationally at Quasar 4.0 (24-hr national hackathon, VPP-COE&VA, Jan 2026)
